

Dr. Andreas Weigend Ph.D.

Leading Online Innovator & Former Chief Scientist of Amazon

"We know nothing, but we can measure it"

Andreas S. Weigend is one of the world's leading innovators, an expert in social and mobile technologies, consumer behaviour and digital marketing. He directs the Social Data Lab, teaches at Stanford University and UC Berkeley and his research centres on how ongoing social data revolution impacts consumers, companies, and society.

TOPICS:

- Data Sets, Tool Sets, Skill Sets, Mindset
- E-commerce, Me-commerce, We-commerce
- Case: The secret of Amazon's Recommendations
- Content, Context, Connection, Community and Conversation (5 C's of marketing)
- Formulating the Equations of the Business in Customer-Centric Terms
- The New Time Scale of Innovation

IN DETAIL:

Andreas Weigend graduated in physics, electrical engineering and philosophy in Munich, Cambridge and Stanford. He was the chief scientist at Amazon.com, where he focused on data strategy and the customer-centric culture that has become central to Amazon's success. Andreas teaches at Stanford (Data Mining), Berkeley (Marketing), and in China (Tsinghua) – his work with students and clients provides him with a precious flow of new ideas constantly enhancing his 15 years of experience.

WHAT HE OFFERS YOU:

Andreas shares his insights on the untapped power of data, challenging the minds of his audiences to help them understand the irreversible change in how individuals express themselves, relate to each other and make purchasing and lifestyle decisions.

LANGUAGES:

He presents in German & English.

PUBLICATIONS:

2000 Computational Finance 1999
(with Yaser S. Abu-Mostafa, Blake LeBaron and Andrew W. Lo)

HOW HE PRESENTS:

Andreas is an engaging and entertaining speaker, he focuses on important, often hard questions and uses carefully chosen examples from his extensive network and vast expertise to expound on these questions. His goal is to challenge the minds of the audience.
