

Hamilton Mann

Originator of the Concept of Artificial Integrity

"On a mission to create machines that exhibit artificial integrity over intelligence"

Hamilton Mann is a tech executive driving Digital and AI transformation across Defence, Aerospace, and Cyber at Thales. An expert in AI, he coined the concept of Artificial Integrity, a paradigm-shifting framework that redefines how we build trustworthy, purpose-driven AI systems for society. He lectures at INSEAD and HEC Paris, conducts doctoral research in AI at École des Ponts et Chaussées, is a Senior Fellow at the Retech Center of the École des Ponts Business School, and a Mentor at the MIT Priscilla King Gray Center.

TOPICS:

- Artificial Intelligence
- Digital Transformation
- Innovation

LANGUAGES:

He presents in English.

2024 Artificial Integrity: The Paths to Leading AI Toward a Human-Centred Future

Podcast: Hamilton Mann Conversation

IN DETAIL:

Hamilton serves as Group Vice President at Thales, co-leading AI and Digital Transformation initiatives, and sits on the advisory board of the Ethical AI Governance Group. Named a Top 10 Technology Thought Leader by Technology Magazine and inducted into the Thinkers50 Radar in 2024. Distinguished as an Honorary Fellow of Leaders Excellence, Harvard Square, and awarded the title of World Eminent Man in Digital and AI for Good by the Who Is Who International Academy & Awards, he is leading the global discourse on the evolution of technology, advocating for a future where Artificial Integrity shapes the AI we build, not just for what it can do, but for what it should do.

WHAT HE OFFERS YOU:

Hamilton speaks compellingly about the intersection of AI, digital transformation and ethical stakes with a strong focus on how technology can serve society (and not the other way around).

HOW HE PRESENTS:

Hamilton's delivery combines strategic insight with visionary optimism, grounded in experience and fuelled by a belief in technology as a force for good.
