- Fort** hcoming 2018How to Build a Healthy Brain

IN DETAIL:

As a nutritionist, Kimberley looks at how things like diet and lifestyle affect our mental health, including disordered eating, gut-brain axis, and our emotional relationship with food. Passionate about the power of psychology to transform lives, Kimberley is committed to demystifying the theories and putting the information into the hands of the people who need it through social media, podcasts, and television appearances. Kimberley hosts the podcast Made of Stronger Stuff alongside Dr Xand van Tulleken on BBC Radio 4. Its unique approach takes the pair on a journey around the human body exploring a different body part in-depth in each episode, asking what it can tell us about our innate capacity for change.

WHAT SHE OFFERS YOU:

Kimberley believes the way we think about mental health, as separate from physical health, is flawed. Her philosophy of Whole Body Mental Health is a comprehensive approach to mental health care; integrating evidence-based nutrition and lifestyle factors with psychological therapy.

HOW SHE PRESENTS:

An exceptional speaker, Kimberley thinks the way we treat mental illness is changing and invites audiences to join the revolution.
